1. Brief Summary of Care:

Patient underwent routine vital signs monitoring on 04/10/2009 and 03/11/2011. A chronic asthma diagnosis was confirmed on 12/07/2013. (CM-000022, CM-000028) On 07/18/2019, the patient established care, had an adult health examination, and was diagnosed with essential hypertension. Lab tests were ordered, and results on 07/23/2019 showed elevated total bilirubin and total cholesterol. (CM-000001 - CM-000002, CM-000004, CM-000028 - CM-000030) An influenza vaccine was administered on 11/05/2019. On 07/13/2020, another adult health examination diagnosed hypertensive disorder, with labs showing low sodium and elevated total bilirubin. (CM-000002, CM-000007, CM-000028 - CM-000030) On 12/29/2020, the patient requested a vasectomy. The first and second doses of the COVID-19 mRNA vaccine were received on 03/26/2021 and 04/16/2021, respectively. (CM-000028 - CM-000030) On 05/12/2021, an influenza vaccine was administered, and an allergy consultation addressed allergic rhinitis and pollen-food allergy. Allergy consultations for rhinitis due to animal dander and pollen continued from 07/07/2021 through 11/17/2021, including antigen extract preparation. (CM-000003, CM-000022, CM-000027 - CM-000028, CM-000030) On 10/14/2021, an adult health examination for hypertensive disorder included lab orders. Results on 10/15/2021 showed elevated calcium and total bilirubin, with an abnormal cholesterol/HDL ratio. (CM-000010, CM-00001, CM-000028, CM-000030) Allergy consultations for allergic rhinitis continued from 10/18/2021 through 09/26/2022, with antigen extract prepared on 07/20/2022. On 07/13/2022, vital signs showed elevated systolic blood pressure. (CM-000003, CM-000028, CM-000030) On 10/14/2022, the patient received both an influenza vaccine and a bivalent COVID-19 mRNA vaccine. Allergy consultations for animal dander continued from 10/17/2022 to 12/12/2022. (CM-000029 - CM-000030) On 01/09/2023, the patient had an adult health examination, received a Tdap vaccination, and was referred to a urologist for fertility care. Extensive lab orders were placed, and medications were ordered. (CM-000002 - CM-000003, CM-00001, CM-000028 - CM-000030) On 02/06/2023, an allergy consultation for perennial allergic rhinitis occurred. On 02/28/2023, the patient had a vasectomy consultation, was screened as a 'Never Smoker', and had medication management for allergy relief. (CM-000001, CM-000022, CM-000027 - CM-000030, CM-000039) Allergy consultations for animal dander continued on 03/06/2023 and 04/05/2023, with a referral to TCC Allergy on 04/07/2023. A follow-up for a planned vasectomy occurred on 04/18/2023, and a post-vasectomy semen analysis was recorded on 04/17/2023. (CM-000001 - CM-000003, CM-000028, CM-000030, CM-000039) Allergy consultations for animal dander continued from 04/24/2023 through 06/07/2023, with an allergy injection administered on the latter date. On 06/15/2023, the patient had an asthma consultation, was diagnosed with intermittent asthma, and received a prescription for Diazepam 10mg. (CM-000022 - CM-000023, CM-000027 - CM-000028, CM-000030, CM-000039) Allergy consultations for animal-induced allergic rhinitis with injections occurred on 06/21/2023, 07/10/2023, and 07/24/2023. On 07/13/2023, the patient had a consultation due to Streptococcus exposure, with a negative rapid strep test. (CM-00001, CM-000023, CM-000028, CM-000030, CM-000039) From 07/31/2023 to 09/20/2023, the patient had multiple consultations and visits for intermittent asthma management, often accompanied by allergy injections. Antigen extract was prepared on 08/16/2023. (CM-000003, CM-000023, CM-000030, CM-000037) Follow-up visits for intermittent asthma management, including treatment adjustments and symptom assessments, continued from 10/11/2023 through 02/12/2024. Allergy injections were administered during these visits. (CM-000023, CM-000037) On 02/13/2024, an annual exam showed vital signs within normal limits. Diagnoses included perennial/seasonal allergic rhinitis/conjunctivitis, oral allergy syndrome, and intermittent asthma, with a treatment plan involving immunotherapy and nasal sprays. (CM-000028, CM-000039) Laboratory tests on 02/13/2024 included a comprehensive metabolic panel, lipid panel, hemoglobin A1c, HIV, HSV, and PCR tests. HIV and PCR tests were negative, but HSV1 IgG was high at 5.69

IV. (CM-000002, CM-000016, CM-000019 - CM-000020) On 05/15/2024, follow-up lab results showed HSV1 IgG still high at 3.15 IV, with retesting recommended. Other PCR, HIV, and RPR screenings remained negative. (CM-000020 - CM-000021) On 08/08/2024, a follow-up for allergic rhinitis and oral allergy syndrome noted symptoms during tree pollen season and nasal turbinate edema. The treatment plan included continuing allergen immunotherapy, Flonase, azelastine, and montelukast, along with an allergy injection and antigen extract preparation. (CM-000003, CM-000023, CM-000038 - CM-000039)

2. Narrative Report Summary of Care:

- **04/10/2009 - AthenaHealth**
  - **Reason for visit/encounter:** Routine vital signs monitoring
  - **Chief complaint:** N/A
  - **Examination findings:** Recorded vital signs including BMI, heart rate, height, systolic and diastolic blood pressure.
  - **Diagnoses:** N/A
  - **Treatment plan/recommendations:** N/A
  - **Source:** (CM-000028)
- **03/11/2011 - AthenaHealth**
  - **Reason for visit/encounter:** Routine vital signs monitoring
  - **Chief complaint:** N/A
  - **Examination findings:** Recorded vital signs including BMI, heart rate, body temperature, systolic and diastolic blood pressure.
  - **Diagnoses:** N/A
  - **Treatment plan/recommendations:** N/A
  - **Source:** (CM-000028)
- **12/07/2013 - AthenaHealth (Dr.) Barrett, Daniel**
  - **Reason for visit/encounter:** Medical history review
  - **Chief complaint:** N/A
  - **Examination findings:** Patient has a history of respiratory disease, specifically asthma, which is chronic in nature.
  - **Diagnoses:** Chronic asthma (ICD9 Code: V12.69; ICD10 Code: Z87.09)
  - **Treatment plan/recommendations:** N/A
  - **Source:** (CM-000022)
- **07/18/2019 - Corvallis Clinic PC (MD) Cleary, Biyce**
  - **Reason for visit/encounter:** Social history assessment
  - **Chief complaint:** N/A
  - **Examination findings:** Patient reported never smoking tobacco and no alcohol consumption. Education level is a 4-year college degree. Patient is self-employed in a STEM nonprofit. Has 2 children.
  - **Diagnoses:** N/A
  - **Treatment plan/recommendations:** N/A
  - **Work status:** Self-employed in a STEM nonprofit
  - **Source:** (CM-000029)
- **07/18/2019 - OR Corvallis Clinic PC (CMA) Wilkerson, Nicole**
  - **Reason for visit/encounter:** Routine vital signs monitoring
  - **Chief complaint:** N/A
  - **Examination findings:** Recorded vital signs including BMI, heart rate, oxygen saturation, systolic and diastolic blood pressure.
  - **Diagnoses:** N/A
  - **Treatment plan/recommendations:** N/A
  - **Source:** (CM-000028)

- **07/18/2019 - The Corvallis Clinic (In-House Lab)**
  - **Reason for visit/encounter:** Lab result orders
  - **Chief complaint:** N/A
  - **Examination findings:** CMP testing was conducted on serum or plasma samples. Lipid panel testing was performed on serum samples. Hemoglobin A1c testing was conducted on blood samples.
  - **Diagnoses:** N/A
  - **Treatment plan/recommendations:** Ordered CMP, lipid panel, and hemoglobin A1c tests.
  - **Source:** (CM-000002)
- **07/18/2019 - Family Practice Asbury (MD) Cleary, Bryce**
  - **Reason for visit/encounter:** Adult health examination
  - **Chief complaint:** N/A
  - **Examination findings:** Health history and a physical examination were conducted.
  - **Diagnoses:** Adult health examination (SNOMED: 268565007, ICD10: Z00.00), Essential hypertension (SNOMED: 59621000, ICD10: I10)
  - **Treatment plan/recommendations:** N/A
  - **Source:** (CM-000030)
- **07/18/2019 - unknown Cleary, Bryce**
  - **Reason for visit/encounter:** Establish care
  - **Chief complaint:** N/A
  - **Examination findings:** Clinic policies and procedures were discussed.
  - **Diagnoses:** N/A
  - **Treatment plan/recommendations:** N/A
  - **Source:** (CM-000001)
- **07/23/2019 - The Corvallis Clinic (In-Housel Lab)**
  - **Reason for visit/encounter:** Comprehensive Metabolic Panel (CMP) and Lipid Panel results review
  - **Chief complaint:** N/A
  - **Examination findings:** CMP results: Sodium 139 mmol/L, Potassium 4.5 mmol/L, Chloride 104 mmol/L, Carbon Dioxide 27 mmol/L, Glucose 99 mg/dL, Urea Nitrogen 19 mg/dL, Creatinine 1.00 mg/dL, Calcium 10.1 mg/dL, Total Protein 7.7 g/dL, Albumin 4.7 g/dL, Globulin 3.0 g/dL, A/G ratio 1.6, AST (SGOT) 36 U/L, ALT (SGPT) 30 U/L, Alkaline Phosphatase 44 U/L, GFR >60 mL/min/1.73 sq m. Total bilirubin was high at 1.4 mg/dL. Lipid panel results: Total cholesterol 200 mg/dL (high), Triglycerides 51 mg/dL. Patient fasted >12 hours.
  - **Diagnoses:** Elevated total bilirubin, elevated total cholesterol.
  - **Treatment plan/recommendations:** N/A
  - **Source:** (CM-000004)
- **11/05/2019 - Family Practice Asbury (MD) Barrett, Daniel**
  - **Reason for visit/encounter:** Immunization
  - **Chief complaint:** N/A
  - **Examination findings:** N/A
  - **Diagnoses:** N/A
  - **Treatment plan/recommendations:** Patient received an active or passive immunization, specifically an influenza vaccine (quadrivalent).
  - **Source:** (CM-000029 - CM-000030)
- **07/13/2020 - Family Practice Asbury (MD) Cleary, Bryce**
  - **Reason for visit/encounter:** Adult health examination
  - **Chief complaint:** N/A
  - **Examination findings:** Health history and a physical examination were conducted.
  - **Diagnoses:** Adult health examination (SNOMED: 268565007, ICD10: Z00.00), Hypertensive disorder (SNOMED: 38341003, ICD10: I10)
  - **Treatment plan/recommendations:** N/A
  - **Source:** (CM-000030)

- **07/13/2020 - The Corvallis Clinic (In-Housel Lab)**
  - **Reason for visit/encounter:** Comprehensive Metabolic Panel (CMP) results review
  - **Chief complaint:** N/A
  - **Examination findings:** CMP results: Sodium 135 mmol/L (low), Total bilirubin 1.6 mg/dL (high). Other measurements (potassium, chloride, carbon dioxide, glucose, urea nitrogen, creatinine, calcium, total protein, albumin, globulin, A/G ratio, AST (SGOT), ALT (SGPT), alkaline phosphatase, GFR) were within normal range. Patient fasted >12 hours.
  - **Diagnoses:** Low sodium, elevated total bilirubin.
  - **Treatment plan/recommendations:** N/A
  - **Source:** (CM-000007)
- **07/13/2020 - OR Corvallis Clinic PC (CMA) Wilkerson, Nicole**
  - **Reason for visit/encounter:** Routine vital signs monitoring
  - **Chief complaint:** N/A
  - **Examination findings:** Recorded vital signs including BMI, heart rate, body temperature, systolic and diastolic blood pressure.
  - **Diagnoses:** N/A
  - **Treatment plan/recommendations:** N/A
  - **Source:** (CM-000028)
- **07/13/2020 - The Corvallis Clinic (In-House Lab)**
  - **Reason for visit/encounter:** Lab result orders
  - **Chief complaint:** N/A
  - **Examination findings:** Lipid panel testing was performed on serum samples. CMP testing was conducted on serum or plasma samples. Hemoglobin A1c testing was conducted on blood samples. Hepatitis C virus Ab testing was performed on serum samples.
  - **Diagnoses:** N/A
  - **Treatment plan/recommendations:** Ordered lipid panel, CMP, hemoglobin A1c, and hepatitis C virus Ab tests.
  - **Source:** (CM-000002)
- **12/29/2020 - OR Corvallis Clinic PC (CMA) Fisher, Janice**
  - **Reason for visit/encounter:** Routine vital signs monitoring.
  - **Chief complaint:** Not specified.
  - **Examination findings:** Body height: 173.99 cm, Body mass index (BMI): 24.4 kg/m2, Body weight: 73935.56g.
  - **Diagnoses:** Not applicable.
  - **Treatment plan/recommendations:** No specific treatment plan documented for this vital signs monitoring event.
  - **Notes:** Reason for visit, chief complaint, diagnoses, and treatment plan are not explicitly detailed in the provided context for this event.
  - **Source:** (CM-000028)
- **12/29/2020 - Family Practice Asbury (MD) Barrett, Daniel**
  - **Reason for visit/encounter:** Vasectomy consultation
  - **Chief complaint:** Patient requested a vasectomy.
  - **Examination findings:** N/A
  - **Diagnoses:** Vasectomy requested (SNOMED: 183997009, ICD10: Z30.2)
  - **Treatment plan/recommendations:** N/A
  - **Source:** (CM-000030)
- **03/26/2021 - Corvallis Clinic PC (Nurse) Nguyen, Ashlee**
  - **Reason for visit/encounter:** COVID-19 vaccination.
  - **Chief complaint:** Not applicable.
  - **Examination findings:** Not applicable.
  - **Diagnoses:** Not applicable.
  - **Treatment plan/recommendations:** Administered first dose of COVID-19 mRNA vaccine (LNP-S, PF, 30 mcg/0.3 mL dose).
  - **Notes:** Chief complaint, examination findings, diagnoses, and work status are not explicitly detailed in the provided context for this event.
  - **Source:** (CM-000029)

- **04/16/2021 - Corvallis Clinic PC (Nurse) Nguyen, Ashlee**
  - **Reason for visit/encounter:** COVID-19 vaccination.
  - **Chief complaint:** Not applicable.
  - **Examination findings:** Not applicable.
  - **Diagnoses:** Not applicable.
  - **Treatment plan/recommendations:** Administered second dose of COVID-19 mRNA vaccine (LNP-S, PF, 30 mcg/0.3 mL dose).
  - **Notes:** Chief complaint, examination findings, diagnoses, and work status are not explicitly detailed in the provided context for this event.
  - **Source:** (CM-000029)
- **05/12/2021 - unknown Solensky, R.**
  - **Reason for visit/encounter:** Influenza vaccination.
  - **Chief complaint:** Not applicable.
  - **Examination findings:** Not applicable.
  - **Diagnoses:** Not applicable.
  - **Treatment plan/recommendations:** Fluarix Quad 2020-2021 (PF) 60 mcg (15mcg x 4)/0.5 mL IM syringe administered.
  - **Notes:** Chief complaint, examination findings, diagnoses, and work status are not explicitly detailed in the provided context for this event.
  - **Source:** (CM-000027)
- **05/12/2021 - Allergy Asbury (MD) Solensky, Roland**
  - **Reason for visit/encounter:** Allergy consultation.
  - **Chief complaint:** Symptoms related to allergic rhinitis and pollen-food allergy.
  - **Examination findings:** Not explicitly detailed in the provided context.
  - **Diagnoses:** Allergic rhinitis caused by pollen (J30.1), allergic rhinitis caused by animal dander (J30.81), pollen-food allergy (Z91.018).
  - **Treatment plan/recommendations:** Not explicitly detailed in the provided context.
  - **Notes:** Examination findings and treatment plan are not explicitly detailed in the provided context for this event.
  - **Source:** (CM-000022, CM-000030)
- **05/12/2021 - OR Corvallis Clinic PC (RN) Kindsvogel, Bethl**
  - **Reason for visit/encounter:** Routine vital signs monitoring.
  - **Chief complaint:** Not specified.
  - **Examination findings:** Body height: 175.26 cm, Body mass index (BMI): 25.1 kg/m2, Body weight: 76974.63g, Systolic blood pressure: 130 mm(Hg), Diastolic blood pressure: 90 mm(Hg).
  - **Diagnoses:** Not applicable.
  - **Treatment plan/recommendations:** No specific treatment plan documented for this vital signs monitoring event.
  - **Notes:** Reason for visit, chief complaint, diagnoses, and treatment plan are not explicitly detailed in the provided context for this event.
  - **Source:** (CM-000028)
- **07/07/2021 - unknown**
  - **Reason for visit/encounter:** Allergy consultation and antigen extract preparation.
  - **Chief complaint:** Symptoms related to allergic rhinitis caused by animal dander and pollen.
  - **Examination findings:** Not explicitly detailed in the provided context.
  - **Diagnoses:** Allergic rhinitis caused by animal dander (J30.81), allergic rhinitis caused by pollen (J30.1), perennial allergic rhinitis (J30.89).
  - **Treatment plan/recommendations:** Antigen extract preparation. Patient instructed for antigen extract preparation.
  - **Notes:** Examination findings are not explicitly detailed in the provided context for this event.

  - **Chief complaint:** Not specified.
  - **Examination findings:** Body height: 175.26 cm, Body mass index (BMI): 24.9 kg/m2, Body weight: 76430.31g, Heart rate: 55 /min, Oxygen saturation: 98%, Systolic blood pressure: 140 mm(Hg), Diastolic blood pressure: 84 mm(Hg).
  - **Diagnoses:** Not applicable.
  - **Treatment plan/recommendations:** No specific treatment plan documented for this vital signs monitoring event.
  - **Notes:** Reason for visit, chief complaint, diagnoses, and treatment plan are not explicitly detailed in the provided context for this event.
  - **Source:** (CM-000028)
- **10/14/2021 - The Corvallis Clinic (In-House Lab)**
  - **Reason for visit/encounter:** Lab testing, including Hepatitis C virus Ab testing.
  - **Chief complaint:** Hepatitis C virus Ab testing on serum samples; chief complaint otherwise not specified.
  - **Examination findings:** Hepatitis C virus Ab, serum test ordered; other examination findings not applicable.
  - **Diagnoses:** Not specified.
  - **Treatment plan/recommendations:** Lab orders placed for lipid panel (serum), CMP (serum or plasma), hemoglobin A1c (QN, blood), and hepatitis C virus Ab (serum).
  - **Notes:** Reason for visit, chief complaint, examination findings, diagnoses, and work status are not explicitly detailed. The provided section content is a 'Plan of Treatment' with multiple lab orders, including Hepatitis C virus Ab, serum, but does not contain results or specific findings for this date. The summary indicates testing was performed.
  - **Source:** (CM-000002)
- **10/15/2021 - The Corvallis Clinic (In-House Lab)**
  - **Reason for visit/encounter:** Lipid panel testing
  - **Chief complaint:** Lipid panel tests performed
  - **Examination findings:** Lipid panel tests performed, including cholesterol, triglycerides, and HDL/LDL ratios. Results were within normal ranges except for cholesterol/HDL ratio.
  - **Diagnoses:** Not specified in event summary or section content.
  - **Treatment plan/recommendations:** No specific treatment plan mentioned.
  - **Notes:** The section content provided for this event details CMP and lipid panel results from 07/23/2019, not 10/15/2021. The summary for this event refers to results from 10/15/2021, indicating a discrepancy between the event date and the detailed section content provided.
  - **Source:** (CM-00001)

- **10/15/2021 - The Corvallis Clinic (In-Housel Lab)**
  - **Reason for visit/encounter:** Comprehensive Metabolic Panel (CMP) testing
  - **Chief complaint:** Comprehensive Metabolic Panel (CMP) conducted
  - **Examination findings:** CMP included measurements of sodium, potassium, chloride, carbon dioxide, glucose, urea nitrogen, creatinine, calcium, total protein, albumin, globulin, A/G ratio, total bilirubin, AST (SGOT), ALT (SGPT), alkaline phosphatase, GFR, and fasting hours. Results were within normal range except for calcium (10.4 mg/dL, high) and total bilirubin (1.4 mg/dL, high).
  - **Diagnoses:** Not specified in event summary or section content.
  - **Treatment plan/recommendations:** No specific treatment plan mentioned.
  - **Notes:** The section content provided for this event details CMP and lipid panel results from 07/23/2019, not 10/15/2021. The summary for this event refers to results from 10/15/2021, indicating a discrepancy between the event date and the detailed section content provided.
  - **Source:** (CM-000010)
- **10/18/2021 - Allergy Asbury (RN) Mast, Lindal**
  - **Reason for visit/encounter:** Allergy consultation
  - **Chief complaint:** Allergic rhinitis caused by pollen
  - **Examination findings:** Not explicitly detailed in the summary or section content for this specific encounter, but the consultation was for allergic rhinitis.
  - **Diagnoses:** Allergic rhinitis caused by pollen (J30.1), Allergic rhinitis caused by animal dander (J30.81), Perennial allergic rhinitis (J30.89).
  - **Treatment plan/recommendations:** No specific treatment plan mentioned.
  - **Notes:** The section content lists multiple past encounters for allergy consultations, with diagnoses for each. This specific event is an allergy consultation by Lindal Mast, RN, for allergic rhinitis caused by pollen, animal dander, and perennial allergic rhinitis.
  - **Source:** (CM-000030)
- **10/21/2021 - Allergy Asbury (RN) Mast, Lindal**
  - **Reason for visit/encounter:** Allergy consultation
  - **Chief complaint:** Allergic rhinitis caused by pollen
  - **Examination findings:** Not explicitly detailed in the summary or section content for this specific encounter, but the consultation was for allergic rhinitis.
  - **Diagnoses:** Allergic rhinitis caused by pollen (J30.1), Allergic rhinitis caused by animal dander (J30.81), Perennial allergic rhinitis (J30.89).
  - **Treatment plan/recommendations:** No specific treatment plan mentioned.
  - **Notes:** The section content lists multiple past encounters for allergy consultations, with diagnoses for each. This specific event is an allergy consultation by Lindal Mast, RN, for allergic rhinitis caused by pollen, animal dander, and perennial allergic rhinitis.
  - **Source:** (CM-000030)

- **01/09/2023 - The Corvallis Clinic (In-House Lab)**
  - **Reason for visit/encounter:** Lab results and orders for Comprehensive Metabolic Panel (CMP), Lipid Panel, and Hemoglobin A1c testing.
  - **Chief complaint:** Comprehensive Metabolic Panel (CMP), Lipid Panel, and Hemoglobin A1c tests performed.
  - **Examination findings:** Lab work was performed. Elevated glucose and total protein levels were noted from the Comprehensive Metabolic Panel (CMP). Specific values for the current date are not detailed, but previous CMP results from 07/23/2019 showed glucose 99 mg/dL and total protein 7.7 g/dL. Detailed findings for Lipid Panel and Hemoglobin A1c are not explicitly provided.
  - **Diagnoses:** Diagnoses are not explicitly stated for these lab events.
  - **Treatment plan/recommendations:** Orders were placed for HIV (1+2) Ab, CT+ NG + TV, HSV (1+2) IgG Ab, Hemoglobin A1c, Lipid Panel, CMP, Rapid Strep Group A, Semen Analysis (post vasectomy), and Hepatitis C virus Ab. Medication orders include montelukast, Tylenol-Codeine #3, lisinopril-hydrochlorothiazide, and azelastine. A referral for a urologist was also made.
  - **Notes:** Specific values for the 01/09/2023 CMP are not explicitly listed, only that elevated glucose and total protein were noted. The detailed section content for CMP results refers to 07/23/2019. Detailed findings, chief complaint, examination findings, and diagnoses for the Lipid Panel and Hemoglobin A1c are not available in the provided summaries. The treatment plan primarily consists of lab and medication orders, and a referral.

- **02/06/2023 - Allergy Asbury (RN) Wallace, Kathleen**
  - **Reason for visit/encounter:** Allergy consultation for perennial allergic rhinitis.
  - **Chief complaint:** Perennial allergic rhinitis.
  - **Examination findings:** Not explicitly detailed for this specific encounter.
  - **Diagnoses:** Perennial allergic rhinitis (SNOMED: 446096008, ICD10: J30.89), Allergic rhinitis caused by pollen (SNOMED: 21719001, ICD10: J30.1), Allergic rhinitis caused by animal dander (SNOMED: 429195002, ICD10: J30.81).
  - **Treatment plan/recommendations:** Not explicitly detailed for this specific encounter.
  - **Notes:** This event is a summary of past encounters, not a specific consultation note with findings and plan for this date.
  - **Source:** (CM-000030)

- **02/28/2023 - Urology Aumann (MD) Brant, Michael**
  - **Reason for visit/encounter:** Consultation for permanent sterilization (vasectomy).
  - **Chief complaint:** Patient desires permanent sterilization (vasectomy).
  - **Examination findings:** Patient is a healthy 40-year-old male with a negative urologic history. HEENT exam is normal, CTA.
  - **Diagnoses:** Vasectomy requested (SNOMED: 183997009, ICD10: Z30.2).
  - **Treatment plan/recommendations:** Patient will return in the future for the vasectomy. Patient was advised to return as needed. Ketotifen 0.025% eye drops, Zyrtec 10 mg tablet, and Flonase Allergy Relief 50 mcg nasal spray were prescribed/continued.
  - **Notes:** The patient is married with three children and does not desire more. Most recent tobacco screening was conducted on this date, indicating 'Never Smoker'.

- **06/15/2023 - Solensky Clinic (MD) Solensky, Roland (Clinic PC)**
  - **Reason for visit/encounter:** Follow-up office visit for allergic rhinitis and oral allergy syndrome.
  - **Chief complaint:** Increased symptoms during grass pollen season despite nearly 2 years of allergy injections. Reports chest tightness and wheezing with cat exposure. Still eats apples and tolerates peaches/nectarines with minimal itching. No longer has private insurance, only IHN.
  - **Examination findings:** HEENT exam is normal. Lungs are CTA (Clear To Auscultation).
  - **Diagnoses:** Perennial/seasonal allergic rhinitis/conjunctivitis due to tree, grass, weed, alternaria, and cats. Oral allergy syndrome due to stone fruits. Intermittent asthma.
  - **Treatment plan/recommendations:** Remix extract and continue allergen immunotherapy. For cat exposure, use montelukast 10mg at least 2 hours before. When azelastine nasal spray runs out (not covered by insurance), use OTC Astepro in a similar PRN fashion. Follow up in 1 year.
  - **Notes:** Patient is a 40-year-old male. Spent 30 minutes on the encounter, including face-to-face and non-face-to-face time.

- **02/13/2024 - OR Corvallis Clinic PC (CMA) Sorensen, Malleiy**
  - **Reason for visit/encounter:** Routine vital signs monitoring.
  - **Chief complaint:** Not applicable.
  - **Examination findings:** BMI: 22.91 kg/m2, Systolic blood pressure: 1161 mm(Hg), Diastolic blood pressure: 80 mm(Hg).
  - **Diagnoses:** Not applicable.
  - **Treatment plan/recommendations:** Not applicable.
  - **Source:** (CM-000028)
- **02/13/2024 - Baxse Clinic (MD) Baxse, OR (Clinic PC)**
  - **Reason for visit/encounter:** Annual exam.
  - **Chief complaint:** Patient is a 41-year-old male presenting for an annual exam.
  - **Examination findings:** HEENT exam is normal. Lungs are CTA.
  - **Diagnoses:** Perennial/seasonal allergic rhinitis/conjunctivitis due to tree, grass, weed pollens, alternaria. Oral allergy syndrome due to stone fruits. Intermittent asthma.
  - **Treatment plan/recommendations:** Continue allergen immunotherapy for 2 more years. Begin Flonase and azelastine nasal spray for the next week for URI to prevent sinus infection. Continue azelastine nasal spray seasonally. Continue montelukast 10mg prn. Follow up in 1 year.
  - **Notes:** The provided text for this encounter also includes details from a previous visit on 06/15/2023 with Roland Solensky, MD, which describes the patient's history of allergy injections, symptoms during grass pollen season, and medication use (azelastine nasal spray, Flonase, oral antihistamines, ketotifen eyedrops). It also mentions past asthma from animals and current cat exposure causing chest tightness and wheezing. The examination findings and diagnoses listed above are from the 02/13/2024 encounter, but the treatment plan seems to combine elements from both the 06/15/2023 and 02/13/2024 encounters.

- **08/08/2024 - Allergy_Asbury (MD) Solensky, Roland**
  - **Reason for visit/encounter:** Intermittent Asthma Visit; Follow-Up Visit for Allergic Rhinitis
  - **Chief complaint:** Patient presents for follow-up regarding allergic rhinitis and oral allergy syndrome. He has been on allergy injections for 3 years with no systemic reactions. He experienced symptoms during tree pollen season, using Flonase and Astepro. He also questions if recent stuffy nose and sinus issues are due to illness or allergies, especially with increased cat exposure.
  - **Examination findings:** HEENT exam shows moderate degree nasal turbinate edema, irritated appearance of nasal mucosa, some mucoid discharge (not purulent). Tympanic membranes clear, mouth and oropharynx clear. Lungs are clear bilaterally.
  - **Diagnoses:** Perennial/seasonal allergic rhinitis/conjunctivitis due to tree, grass, weed pollens, alternaria. Oral allergy syndrome due to stone fruits. Intermittent asthma.
  - **Treatment plan/recommendations:** Continue allergen immunotherapy for 2 more years. Begin Flonase and azelastine nasal spray for the next week to prevent sinus infection. Continue montelukast 10mg as needed. Follow up in 1 year.
  - **Notes:** The patient has a history of asthma symptoms (chest tightness, wheezing) related to cat exposure prior to allergy shots. He tolerates apples, plums, cherries, and peaches with minimal itching. He no longer has private insurance, only IHN.
  - **Source:** (CM-000038 - CM-000039)
- **08/08/2024 - unknown**
  - **Reason for visit/encounter:** Allergy Injection Follow-Up
  - **Chief complaint:** Patient received allergy injections as part of ongoing treatment.
  - **Examination findings:** Not specified for this encounter.
  - **Diagnoses:** Not specified for this encounter.
  - **Treatment plan/recommendations:** Patient instructed to return for one more set of shots from the present bottle next week.
  - **Notes:** This event primarily documents patient instructions for continued allergy injections. Specific clinical details are not provided here, but are covered in the detailed follow-up visit on the same date.
  - **Source:** (CM-000003)

- Allergic rhinitis caused by animal dander (J30.81) (CM-000030, CM-000037)
- Allergic rhinitis caused by pollen (J30.1) (CM-000030, CM-000037)
- Perennial allergic rhinitis (J30.89) (CM-000030, CM-000037)
- Allergic rhinitis caused by animal dander (J30.81). Allergic rhinitis caused by pollen (J30.1). Perennial allergic rhinitis (J30.89). (CM-000030)
- Allergic rhinitis caused by animal (J30.81) (CM-000030, CM-000037)
- Allergic rhinitis caused by pollen (J30.1). Allergic rhinitis caused by animal (J30.81). Perennial allergic rhinitis (J30.89). (CM-000030)
- Allergic rhinitis caused by pollen (J30.1). Perennial allergic rhinitis (J30.89). Allergic rhinitis caused by animal dander (J30.81). (CM-000030)
- Adult health examination (Z00.00) (CM-000030, CM-000037)
- Adult health examination (Z00.00). Hypertensive disorder (I10). (CM-000030)
- Hypertensive disorder (I10) (CM-000030, CM-000037)
- Allergic rhinitis caused by animal dander (J30.81) (CM-000030, CM-000037, CM-000039)
- Allergic rhinitis caused by pollen (J30.1) (CM-000030, CM-000037, CM-000039)
- Perennial allergic rhinitis (J30.89) (CM-000030, CM-000037, CM-000039)
- Vasectomy requested (SNOMED: 183997009).
- Intermittent asthma (SNOMED: 427603009) (CM-000022, CM-000030, CM-000037 - CM-000039)
- Oral allergy syndrome due to stone fruits (Z91.018) (CM-000038 - CM-000039)
- Perennial/seasonal allergic rhinitis/conjunctivitis due to tree, grass, weed pollens, alternaria. (J30.1, J30.81, J30.89) (CM-000038 - CM-000039)
- Exposure to Streptococcus. (CM-000030, CM-000039)
- HIV 1,2 (4th Gen) test negative for anti-HIV-1, anti-HIV-2, and HIV p24 antigen. (CM-000021)
- HSV1 IgG positive (3.15 IV, reference range 0.0-0.9 IV). HSV2 IgG negative (0.140 IV). (CM-000020)
- Negative for Gonorrhoeae, Trichomonas Vaginalis, and Chlamydia Trachomatis. (CM-000020)
- RPR screening test for syphilis nonreactive. (CM-000021)

4. Past Medical and Surgical History:

- Family history of Diabetes mellitus (Mother). (CM-000029)
- Family history of Hyperlipidemia (Father). (CM-000029)
- Family history of Myocardial infarction (Father). (CM-000029)
- Allergies/Hayfever. (CM-000029)
- Hypertension. (CM-000029)
- History of respiratory disease (Z87.09). (CM-000022)
- Adult health examination. (CM-000030)
- Adult health examination (Z00.00) (CM-000030)
- CMP, lipid panel, and hemoglobin A1c blood tests performed. (CM-000002)
- Adult health examination (Z00.00). (CM-000030)
- Lipid panel results showed total cholesterol 200 mg/dL (high). (CM-00001)
- CMP results showed total bilirubin 1.4 mg/dL (high). (CM-000010)
- Influenza vaccine administered (quadrivalent, split virus, PF). (CM-000029 - CM-000030)
- Active or passive immunization (Z23) for influenza vaccine. (CM-000030)
- Active or passive immunization (Z23) for Influenza vaccine. (CM-000030)
- Adult health examination. (CM-000030)
- Adult health examination (Z00.00) (CM-000030)
- CMP, lipid panel, hemoglobin A1c, and hepatitis C virus Ab blood tests performed. (CM-000002)
- Adult health examination (Z00.00). (CM-000030)
- Vasectomy requested (Z30.2) (CM-000030)
- Vasectomy requested (Z30.2). (CM-000030, CM-000037)
- Received first dose of COVID-19 mRNA vaccine. (CM-000029)
- Received second dose of COVID-19 mRNA vaccine. (CM-000029)
- Fluarix Quad 2020-2021 (PF) 60 mcg (15mcg x 4)/0.5 mL IM syringe administered. (CM-000027)
- Adult health examination performed. (CM-000030)
- CMP, lipid panel, hemoglobin A1c, and hepatitis C virus Ab blood tests performed. (CM-000002)
- Lipid panel results were within normal ranges except for cholesterol/HDL ratio. (CM-00001)
- Comprehensive Metabolic Panel (CMP) results were within normal range except for calcium (10.4 mg/dL, high) and total bilirubin (1.4 mg/dL, high). (CM-000010)

- CMP, lipid panel, and hemoglobin A1c blood tests performed. Urologist referral made. (CM-000002)
- Allergy Injection administered by Kathleen Wallace, RN.
- Allergy Injection administered by Kathleen Wallace, RN.
- Vasectomy requested (183997009). (CM-000022, CM-000030, CM-000039)
- Vasectomy.
- Vasectomy performed by Michael Brant, MD at OR Corvallis Clinic PC. (CM-000039)
- Vasectomy performed by Michael Brant, MD. (CM-000039)
- Allergy Injection administered by Kathleen Wallace, RN.
- Allergy Injection administered by Kathleen Wallace, RN.
- Semen analysis (post vasectomy) was conducted. (CM-000002)
- Semen analysis (post vasectomy) ordered. (CM-000002)
- Patient presented for a planned vasectomy procedure. (CM-000030, CM-000039)
- Vasectomy.
- Vasectomy procedure completed by Michael Brant, MD at OR Corvallis Clinic PC. (CM-000039)
- Vasectomy performed by Michael Brant, MD. (CM-000039)
- Allergy Injection administered by Rachel Poff.
- Allergy Injection administered by Laura Arbogast, RN.

5. Medications:

- Lisinopril 20 mg-hydrochlorothiazide 12.5 mg tablet: Take 1 tablet by mouth once daily. Appointment required for future refills. Status: Active. (CM-000027)
- Montelukast 10 mg tablet: Take 1 tablet by mouth once daily as needed prior to cat exposure. Status: Active. (CM-000027)
- Azelastine 137 mcg (0.1%) nasal spray: Spray by intranasal route as needed with allergy exacerbation. Status: Active. (CM-000027)
- Sodium fluoride 1.1% dental paste: After flossing, brush pea-sized drop on teeth and spit out. Status: Active. (CM-000027)
- Nasonex 50 mcg/actuation spray: Use 2 sprays in each nostril once daily. Prescribed 04/10/2009, completed 03/11/2011. Status: Completed. (CM-000027)
- Patanol 0.1% eye drops: Instill 1 drop into affected eye(s) twice daily as directed. Prescribed 04/22/2009, completed 07/18/2019. Status: Completed. (CM-000027)
- Lisinopril 20 mg-hydrochlorothiazide 12.5 mg tablet. (CM-000002)
- Lisinopril-hydrochlorothiazide 20 mg-12.5 mg tablet. (CM-000002)
- Flonase Allergy Relief. Status: Completed. (CM-000027)
- Azelastine 137 mcg (0.1%) nasal spray: Ordered on 05/12/2021.
- Azelastine 137 mcg (0.1%) nasal spray. (CM-000002)
- Azelastine 137 mcg (0.1 %) nasal spray. (CM-000002)
- Fluarix Quad 2020-2021 (PF) 60 mcg (15mcg x 4)/0.5 mL IM syringe. Status: Completed. (CM-000027)
- Lisinopril 20 mg-hydrochlorothiazide 12.5 mg tablet: Ordered on 10/14/2021.
- Ketotifen 0.025% eye drops: Instill 1 drop into affected eye(s) by ophthalmic route 2 times per day. (CM-000027)
- Zyrtec 10 mg tablet: Take 1 tablet every day by oral route as needed. (CM-000027)
- Flonase Allergy Relief 50 mcg/actuation nasal spray, suspension: Spray every day by intranasal route. (CM-000027)
- Ketotifen 0.025% (0.035%) eye drops: Instill 1 drop into affected eye(s) by ophthalmic route 2 times per day. Status: Completed. (CM-000027)
- Zyrtec 10 mg tablet: Take 1 tablet every day by oral route as needed. Status: Completed. (CM-000027)
- Clear Eyes Complete. Status: Completed. (CM-000027)
- Flonase Allergy Relief 50 mcg/actuation nasal spray, suspension: Spray every day intranasal route. Status: Completed. (CM-000027)
- Tylenol-Codeine #3: 300 mg-30 mg tablet. (CM-000002)
- Acetaminophen 300 mg codeine 30 mg tablet: Take 1 tablet by mouth every 4 hours as needed. Status: Completed. (CM-000027)
- Diazepam 10 mg tablet: Take 1 tablet by mouth 1 hour prior to procedure. Status: Completed. (CM-000027)
- Azelastine nasal 0.1%, 1 or 2 sprays each side as needed. Patient rarely uses Flonase or oral antihistamines or ketotifen eyedrops. (CM-000039)
- Montelukast 10 mg tablet. (CM-000002)
- Azelastine nasal spray, now used seasonally. Patient also used Flonase and Astepro, and got a refill for Montelukast 10mg. (CM-000039)
- Montelukast 10mg as needed. (CM-000039)
- Flonase, for the next week for URI to prevent sinus infection. (CM-000039)

6. Functional status:

- On 07/18/2019, the patient's functional status was noted as 'None recorded'.
- On 07/18/2019, the patient's functional status was noted as none recorded. This indicates that specific details regarding functional limitations or abilities were not documented at this time. (CM-000029)
- Functional status was noted as 'None recorded' on 03/26/2021 and 04/16/2021. No specific limitations were documented. (CM-000029)

- On 10/18/2021, the patient consulted for allergic rhinitis caused by pollen. On 10/21/2021, the patient again consulted for allergic rhinitis caused by pollen. On 10/28/2021, the patient consulted for allergic rhinitis caused by animal. On 11/08/2021, the patient consulted for allergic rhinitis caused by animal. On 12/01/2021, the patient consulted for allergic rhinitis caused by pollen. On 01/03/2022, the patient consulted for allergic rhinitis caused by animal. On 01/13/2022, the patient consulted for allergic rhinitis caused by animal. On 01/20/2022, the patient consulted for allergic rhinitis caused by pollen. On 01/27/2022, the patient consulted for allergic rhinitis caused by animal. On 02/03/2022, the patient consulted for allergic rhinitis caused by animal. On 02/09/2022, the patient consulted for allergic rhinitis caused by pollen. No other specific functional limitations were recorded. (CM-000030)
- On 02/17/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- On 02/24/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- On 03/03/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- On 03/10/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- On 03/17/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- On 03/30/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- On 04/07/2022, the patient was consulted for allergic rhinitis caused by pollen. (CM-000030)
- On 04/20/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- On 05/05/2022, the patient was consulted for allergic rhinitis caused by pollen. (CM-000030)
- On 05/26/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- On 06/09/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- On 06/23/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- On 07/13/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- On 07/13/2022, vital signs were recorded, including BMI, systolic and diastolic blood pressure. (CM-000028)
- On 07/20/2022, the patient was consulted for allergic rhinitis caused by animal dander. (CM-000030)
- No functional status was recorded as of 10/14/2022. (CM-000029)
- On 06/07/2023, the patient was consulted for allergic rhinitis caused by animal. An allergy injection was administered by RN Amanda Wilkerson. (CM-000023, CM-000030)
- On 06/15/2023, the patient was diagnosed with intermittent asthma and consulted for this condition. During a follow-up visit for allergic rhinitis and oral allergy syndrome, the patient, a 40-year-old male, reported increased symptoms during the grass pollen season despite nearly two years of allergy injections. He experiences chest tightness and wheezing upon cat exposure, which has caused asthma symptoms in the past. He currently does not use an inhaler. He tolerates apples, plums, cherries, and peaches with minimal itching. Vital signs recorded on the same day included a BMI of 24.7 kg/m2, systolic blood pressure of 132 mmHg, and diastolic blood pressure of 72 mmHg. (CM-000022, CM-000028, CM-000030, CM-000039)
- On 06/21/2023, the patient had an allergy consultation for allergic rhinitis caused by animal. An allergy injection was administered by RN Amanda Wilkerson. (CM-000023, CM-000030)
- On 07/10/2023, the patient was consulted for allergic rhinitis caused by animal. An allergy injection was administered by RN Kathleen Wallace. (CM-000023, CM-000030)
- On 07/13/2023, the patient was evaluated for exposure to Streptococcus due to his son's recent diagnosis and requested a strep throat test to ensure he did not pose a risk to immunocompromised family members, despite being asymptomatic. A rapid Group A Strep screen was performed on throat samples, and the results were negative. Vital signs recorded on the same day included a heart rate of 75 bpm, oxygen saturation of 98%, body temperature of 98.5°F, systolic blood pressure of 118 mmHg, and diastolic blood pressure of 86 mmHg. (CM-00001, CM-000028, CM-000030, CM-000039)
- On 07/24/2023, the patient was consulted for allergic rhinitis caused by animal. An allergy injection was administered by RN Jeanean Rauch. (CM-000023, CM-000030)
- On 07/31/2023, the patient was consulted for intermittent asthma. (CM-000030)
- On 08/16/2023, the patient was consulted for intermittent asthma. On 08/28/2023, the patient was again consulted for intermittent asthma. A follow-up visit for intermittent asthma management occurred on 10/11/2023, where the patient reported ongoing symptoms and received further guidance. On 11/01/2023, the patient was evaluated for intermittent asthma, and treatment adjustments were made. On 11/22/2023, an assessment of asthma symptoms and management plan review was conducted. A routine check-up for intermittent asthma was performed on 12/20/2023, and the patient was advised on medication adherence. (CM-000030, CM-000037)

- On 01/24/2024, the patient had a follow-up visit for asthma management and reported improvement in symptoms. On 02/12/2024, the patient's asthma control was assessed, and adjustments to the treatment plan were discussed. On 02/13/2024, the patient's history indicates intermittent asthma, perennial/seasonal allergic rhinitis/conjunctivitis due to tree, grass, weed pollens, and alternaria, as well as oral allergy syndrome due to stone fruits. Past reactions to cats involved chest tightness and wheezing, indicating asthma symptoms. The patient currently does not have an inhaler but has been prescribed montelukast 10mg prn and azelastine nasal spray for seasonal use. He tolerates apples, plums, cherries, and peaches, with minimal itching from stone fruits. He has experienced a stuffy nose and sinus issues, questioning if it's sickness or allergies. Physical examination on 02/13/2024 showed moderate nasal turbinate edema and irritated appearance of nasal mucosa with some mucoid discharge. (CM-000037, CM-000039)
- On 02/21/2024, the patient had a routine follow-up for asthma management and was educated on trigger avoidance. On 03/13/2024, the visit focused on asthma symptom management and medication review. On 04/04/2024, the patient was evaluated for asthma symptoms, and the treatment plan was adjusted. A routine check-up for asthma management occurred on 05/29/2024, where the patient was advised on lifestyle modifications. (CM-000037)
- On 06/24/2024, the patient was assessed for asthma control, and treatment options were discussed. (CM-000037)
- On 06/24/2024, an allergy injection was administered by RN Jeanean Rauch. (CM-000023)
- On 07/15/2024, a follow-up visit for asthma management occurred, and the patient reported no significant issues. (CM-000037)
- On 07/15/2024, an allergy injection was administered by RN Jeanean Rauch. (CM-000023)
- On 07/22/2024, a routine follow-up for asthma management was conducted, and the patient was educated on inhaler technique. (CM-000038)
- On 07/22/2024, an allergy injection was administered by RN Jeanean Rauch. (CM-000023)
- On 08/08/2024, the patient was evaluated for asthma symptoms and allergic rhinitis, and treatment options were discussed. The patient has intermittent asthma and oral allergy syndrome due to stone fruits. He has been on allergy injections for 3 years with no systemic reactions. He experiences chest tightness and wheezing when exposed to cats, which are asthma symptoms. He tolerates apples, plums, cherries, and peaches with minimal itching. He currently does not have an inhaler. He was instructed to continue allergen immunotherapy for 2 more years and to begin Flonase and azelastine nasal spray for the next week to prevent a sinus infection. Montelukast 10mg PRN was also continued. Follow-up is scheduled in 1 year. (CM-000038 - CM-000039)
- On 08/08/2024, an allergy injection was administered by RN Laura Arbogast. The patient was instructed to return for one more set of allergy shots from the present bottle next week. (CM-000003, CM-000023)
- On 08/08/2024, vital signs were recorded, including a BMI of 23.51 kg/m2, systolic blood pressure of 120 mm(Hg), and diastolic blood pressure of 76 mm(Hg). (CM-000028)
- On 08/21/2024, a follow-up visit for asthma management occurred, and the patient reported improvement in symptoms. (CM-000038)
- On 08/21/2024, an allergy injection was administered by RN Kathleen Wallace. (CM-000023)
- On 08/27/2024, the patient was assessed for asthma control, and treatment adjustments were made based on feedback. (CM-000038)
- On 08/27/2024, antigen extract was prepared by RN Jeanean Rauch. The patient was instructed on antigen extract preparation. (CM-000003, CM-000023)

7. Psychosocial:

- On 07/18/2019, the patient was recorded as a never smoker with no alcohol consumption. He was married and had 2 children. There is a discrepancy in the number of children reported, as a later entry on 02/28/2023 states he has 3 children.
- On 07/18/2019, the patient reported never smoking tobacco and no alcohol consumption. (CM-000029)
- On 03/26/2021 and 04/16/2021, the patient was recorded as a 'Never Smoker' and reported 'None' for alcohol consumption. The patient has 2 children. (CM-000029)
- The patient is a never smoker and reports no alcohol consumption as of 07/18/2019. The patient has two children. The patient received the third dose of the COVID-19 mRNA vaccine on 01/05/2022. (CM-000029)

- On 07/18/2019, the patient was recorded as a never smoker, with no tobacco cessation counseling provided. Alcohol consumption was reported as none. The patient has 2 children. (CM-000029)
- The most recent tobacco screening was on 02/28/2023. (CM-000029)
- On 02/28/2023, the patient, a healthy 40-year-old male, sought permanent sterilization. He was married and reported having 3 children, not desiring any more. The most recent tobacco screening was also conducted on this date. (CM-000039)
- As of 06/15/2023, the patient no longer has private insurance and is covered by IHN. (CM-000039)
- On 02/13/2024, the patient is noted to be a 41-year-old male. He no longer has private insurance, only IHN. He has increased exposure to cats due to his girlfriend's home and his new business, 'Queen B organizing business', which requires him to be in houses with cats. This exposure has previously caused chest tightness and wheezing. (CM-000039)
- On 08/08/2024, the patient, a 40-year-old male, is married with 3 children and does not desire more. He has a new girlfriend and has been exposed to cats at her home. He also purchased 'the Queen B organizing business,' which requires him to be in houses with cats, leading to increased cat exposure. This exposure has caused chest tightness and wheezing, which are asthma symptoms. He has no other relevant psychosocial factors mentioned. (CM-000039)

8. Educational History:

- As of 07/18/2019, the patient has 41 years of college education.
- On 07/18/2019, the patient's education level was recorded as '4 Year College'.
- No specific information regarding the patient's educational history is available in the provided records.
- No specific educational history is available in the provided records.
- On 07/18/2019, the patient's education level was recorded as a 41-year college degree. (CM-000029)
- On 03/26/2021 and 04/16/2021, the patient's education was recorded as '4 Year College'. (CM-000029)
- On 07/18/2019, the patient's education was recorded as '41 Year College'. (CM-000029)

9. Work History:

- As of 07/18/2019, the patient is self-employed in a STEM Nonprofit. No relevant work-related injuries were recorded.
- On 07/18/2019, the patient's occupation was listed as 'Self Employed STEM Nonprofit'.
- On 06/15/2023, it was noted that the patient purchased the Queen B organizing business, which sometimes requires him to be in a house with a cat.
- On 07/18/2019, the patient was noted to be self-employed in a STEM nonprofit. (CM-000029)
- On 03/26/2021 and 04/16/2021, the patient's occupation was recorded as 'Self Employed STEM Nonprofit'. No work-related injuries were mentioned. (CM-000029)
- On 07/18/2019, the patient's occupation was recorded as 'Self Employed STEM Nonprofit'. (CM-000029)
- On 02/13/2024, the patient purchased the 'Queen B organizing business', which requires him to be in houses where cats reside. This is relevant due to his history of asthma symptoms (chest tightness, wheezing) triggered by cat exposure. (CM-000039)
- On 08/08/2024, the patient purchased 'the Queen B organizing business,' which requires him to be in houses with cats. This work-related exposure to cats has exacerbated his asthma symptoms, including chest tightness and wheezing. (CM-000039)

10. Future Care Recommendations:

- **07/07/2021:** Antigen extract preparation. (CM-000003)
- Antigen extract preparation. (CM-000003)
- Urologist referral. (CM-000002)
- Patient will return in the future for the vasectomy. (CM-000001)
- Referral for seasonal allergic rhinitis to TCC Allergy. (CM-000003)
- Semen analysis (post vasectomy) ordered.
- Patient will return to see us as needed. (CM-000001)
- Continue allergen immunotherapy for 2 more years. For cat exposure, use montelukast 10mg at least 2 hours before. When azelastine nasal spray runs out, use OTC Astepro in a similar PRN fashion. Follow up in 1 year. (CM-000039)

- Remix extract and continue allergen immunotherapy. For cat exposure, use Montelukast 10 mg and Zyrtec 10 mg at least 2 hours before. If azelastine nasal spray runs out, use OTC Astepro in similar PRN fashion. Follow up in 1 year. (CM-000039)
- Continue allergy injections for nearly 2 years. For cat exposure, use Montelukast 10mg and Cetirizine 10mg at least 2 hours before. If azelastine nasal spray runs out, use OTC Astepro in similar PRN fashion. Follow up in 1 year. (CM-000039)
- Continue allergy injections for nearly 2 more years. When azelastine nasal spray runs out, use OTC Astepro in similar PRN fashion. Follow up in 1 year. (CM-000039)
- Antigen extract preparation. (CM-000003)
- Retesting for HSV 1 and 2 IgG recommended in 4-6 weeks for equivocal results. (CM-000020)
- Routine follow-up for asthma management. Patient was educated on trigger avoidance. (CM-000037)
- Visit focused on asthma symptom management and medication review.
- Patient evaluated for asthma symptoms. Treatment plan was adjusted based on the assessment. (CM-000037)
- Follow-up visit for asthma management. The patient reported stable symptoms. (CM-000037)
- Retesting for HSV1 IgG recommended in 4-6 weeks for equivocal results. (CM-000020)
- Routine check-up for asthma management. The patient was advised on lifestyle modifications. (CM-000037)
- Continue allergen immunotherapy for 2 more years. Begin Flonase and azelastine nasal spray for the next week to prevent sinus infection. Continue azelastine nasal spray seasonally. Continue montelukast 10mg PRN. Follow up in 1 year. (CM-000039)
- Two or more years of allergy injections. Return for one more set of shots from present bottle next week. (CM-000003)
- Patient instructed to return for one more set of allergy shots from the present bottle next week. (CM-000003)
- Continue allergen immunotherapy for 2 more years. Begin Flonase and azelastine nasal spray for the next week for URI to prevent sinus infection. Continue azelastine nasal spray seasonally. Continue montelukast 10mg PRN. Follow up in 1 year. (CM-000039)
- Return for one more set of allergy shots from the present bottle next week. (CM-000003)
- Antigen extract preparation. (CM-000003)

			444 NW Elks Drive, Corvallis, OR, 97330-3745, US		
02/28/2023	text/html	HPI Notes: This patient is a healthy 40-year-old male who desires permanent sterilization. His urologic history is negative. He is married and has 3 children and do not desire any others.	Michael Brant, MD 444 NW Elks Drive, Corvallis, OR, 97330-3745, US	OR - Corvallis Clinic PC	02/28/2023 13:39:29
04/18/2023	text/html	HPI Notes: this patient is a 40-year-old male previously seen in consultation for vasectomy. He now presents for the planned procedure.	Michael Brant, MD 444 NW Elks Drive, Corvallis, OR, 97330-3745, US	OR - Corvallis Clinic PC	04/18/2023 18:52:53
06/15/2023	text/html	HPI Notes: SUBJECTIVE: I saw the patient for a follow up office visit for allergic rhinitis and oral allergy syndrome. He has been on allergy injections for nearly 2 years, no systemic reactions, maybe stenosis of 0.4 mL full-strength bottles. This year he has had more symptoms during the grass pollen season and last year but still infinitely better compared to before shots. Only medication he takes is azelastine nasal spray 0.1%, 1 or 2 sprays each side p.r.n.. Never has to use Flonase or oral antihistamines or ketotifen eyedrops. He has not been around cats very much, but after purchasing the Queen B organizing business, sometimes he has to be in a house with a cat or where a cat has resided for 1-2 hours and that brings back to chest tightness wheezing causing him to leave. He has had asthma in the past from animals and when he was younger other triggers, not usually pollen, however. Presently does not have an inhaler. Still eats apples year-round no reactions to that, after eating a couple of peaches or nectarines he had minimal itching. Also had cherries which did not cause reaction recently. He no longer has private insurance, just IHN. PHYSICAL EXAMINATION: HEENT exam is normal. Lungs are CTA. DIAGNOSES Perennial/seasonal allergic rhinitis/conjunctivitis due to tree, grass, weed pollens, alternaria, and cats. Oral allergy syndrome due to stone fruits. Intermittent asthma. PLAN Remix allergy extract and continue allergen immunotherapy for 3 more years and I reviewed the reasoning behind that with the patient. Prior to cat exposure, use montelukast 10 mg and cetirizine 10 mg at least 2 hours before. He had montelukast in the past for pollen and was not helpful for that but now for the cat exposure especially since he has been on shots it should prevent asthma. I do not think he needs an inhaler at this point. When his azelastine nasal spray runs out, this is not covered by his insurance, so purchase OTC Astepro and use in similar p.r.n. fashion. Follow up in 1 year. I spent 30 minutes on the encounter, including both face-to-face and non-face-to-face time (preparing to see the patient, reviewing records, test ordering and documenting in the clinical chart, not including skin testing). _____ Roland Solensky, MD Allergy and Immunology	Roland Solensky, MD 444 NW Elks Drive, Corvallis, OR, 97330-3745, US	OR - Corvallis Clinic PC	06/15/2023 19:16:27
07/13/2023	text/html	HPI Notes: 41-year-old male presents today with request for a test for strep throat. His son was recently diagnosed and started on treatment. He is requesting the test because his family is going to be visiting someone who is immunocompromised. He does not have any symptoms.	Benjamin Oldson, DO 444 NW Elks Drive, Corvallis, OR, 97330-3745, US	OR - Corvallis Clinic PC	07/13/2023 20:42:30
02/13/2024	text/html	HPI Notes: Patient is a pleasant 41-year-old male who comes in today for annual exam. [redacted]	Bryce Cleary, MD 444 NW Elks Drive, Corvallis, OR, 97330-3745, US	OR - Corvallis Clinic PC	02/13/2024 14:43:17
08/08/2024	text/html	HPI Notes: SUBJECTIVE: I saw the patient for a follow up office visit for allergic rhinitis and oral allergy syndrome. He has been on allergy injections for 3 years, no systemic reactions, maintenance dose 0.4 mL full-strength bottles. He recalls having about 2 maybe 3 weeks of symptoms and this is late February or early March, so tree pollen season, ended up using Flonase and Astepro, not every day, and also got a refill of montelukast. He was trying to figure out if this was exposure to cats at his new girlfriend's home or pollen, but the symptoms did not persist so likely was pollen related. The grass pollen season he had no such peak of symptoms. Has not had to use any oral antihistamines or ketotifen eyedrops. He has been around cats more, both at the girlfriend's home and he purchased the Queen B organizing business, so he has to be in a house with a cat occasionally because of that. Prior to shots reactions to cats involved wheezing chest tightness, so asthma symptoms as well as nasal ocular symptoms. Presently does not have an inhaler. Still eats and tolerates apples, he has plums cherries the summer peaches, a year ago ate those and had minimal itching. The last week or so he has had a stuffy nose sinus pressure, questions if he is sick or if this is allergies. ROS: No changes. PHYSICAL EXAMINATION: HEENT exam shows moderate degree nasal turbinate edema irritated appearance nasal mucosa bilaterally not pale. Some mucoid discharge nothing purulent. Tympanic membranes clear. Mouth oropharynx clear. Lungs are CTA. DIAGNOSES Perennial/seasonal allergic rhinitis/conjunctivitis due to tree, grass, weed pollens, alternaria, and cats. Oral allergy syndrome due to stone fruits. Intermittent asthma. PLAN Remix allergy extract and continue allergen immunotherapy for 2 more years and I reviewed the reasoning behind that with the patient. Begin Flonase and azelastine nasal spray daily for the next week for the URI to try to prevent this from going into a sinus infection. Does not need antibiotics but if not better in a week contact me. Continue azelastine nasal spray which is now Astepro p.r.n. seasonally. Continue montelukast 10 mg p.r.n. Follow up in 1 year. _____ Roland Solensky, MD Allergy and Immunology	Roland Solensky, MD 444 NW Elks Drive, Corvallis, OR, 97330-3745, US	OR - Corvallis Clinic PC	08/08/2024 13:52:25
